PROFILE

I have been learning to program since high school, when my buddy showed me a simple app he had made. For the past year I have been passionate about coding, reading blogs about the latest trends and creating small applications. Over 6 months ago I decided to pursue a career in coding. Since then I have worked on some projects, from designing and creating a E Commerce in Django.

I know a lot more than my development experience may suggest and am constantly looking to hone my skills as a programmer, network, and create some awesome software.

I am a person with a great desire to grow professionally and to contribute my talent, ideas and enthusiasm for learning to benefit society through programming, which I believe is the tool that will help improve our quality of life.

My passion for programming has led me to acquire self-taught knowledge of computer science, as well as languages such as Python. There are also plans to develop in the direction JavaScript. I am currently working as a Matrose in Germany...

- Understanding of front-end technologies (JavaScript, HTML5, CSS3)
- Coding and scripting skills in Python
- Effective communication skills
- Interpersonal and teamwork skills

EMPLOYMENT HISTORY

Develop E-commerce Web Application , Upwork

Oct 2021 — Jan 2022, Remote

Develop E-commerce Web Application at Upwork, Remote September 2021 — December 2021

- Ensured smooth communication between the development team and the client, focusing on a correct transition of the requirements and specifications.
- Independently optimized an aging code and deployed a new source code, reducing the client's page startup time by 25%.

This project deals with developing a Virtual website 'E commerce Website'. It provides the user with a list of the various products available for purchase in the store. For the convenience of online shopping, a shopping cart is provided to the user. After the selection of the goods, it is sent for the order confirmation process. The system is implemented using Python's web framework Django.

- Environments: Django MTV
- Position: Amateur Developer
- Role: I was performing/ responsible for following task's:
- Web application development;
- CRUD
- PEP8
- Build an Ecommerce basket with session handling,

troubleshooting, refactoring, performance tuning.
